VACCINE NAME		AGE GROUPS	WHEN TO BOOST- general principles and comments
HEPATITIS A vaccin	e (and schedules)		
	have different timings - note	Ch. 4, 1 paragraph in GB	Ideally, follow the summary of product
VAQTA® Paediatric	2 dose schedule of		characteristics but in late - presenting
	hepatitis. A vaccine	1-17 years	travellers, a course does not need to be
VAQTA® Adult	should be given at day 0	18 years and over	restarted. Protection is expected for 25
Avaxim®	and then 6 to 12 months after the initial dose as	16 years and over	years from the second dose, then a
Avaxim® Junior		1-15 years	further booster is generally not
Havrix Junior	recommended in Green Book for hep A vaccines.	1-15 years	needed, except for those at ongoing
Monodose®	BOOK for flep A vaccines.		risk (<u>UKHSA 2022</u>). Also see NaTHNaC
Havrix Monodose®	Regimes may vary in	16 years and over	& info on Hepatitis A ** plus detail
	SmPCs, see above • & key		below within the ' Key ' section regarding
			GSK 'Havrix' vaccines***.
TYPHOID vaccine			<u> </u>
Typhim Vi® Single dos	se	2 years and over	3 years
-		(but see GB for off-	
\" \" \" \" \" \" \" \" \" \" \" \" \" \		license use from 12mths)	2 years /Toko with sold on life warms did to
Vivotif® (Ty21a) Oral vaccine on days 0, 2 & 4		5 years and over	3 years (Take with cold or luke warm drink 1 hr beforemeal, swallow capsule whole)
HEPATITIS B vaccin	e (and schedules) Impor	tant – Hep B now in the	childhood programme not included here
Engerix B [®] - 0, 1 and 6 months		Over 16 years	Note: 0, 1, 2 month schedule Green Book
Engerix B® - 0, 1, 2 m	onths	Over 16 years	doesn't advise 4 th dose at 12 months
Engerix B [®] - 0, 7, 21 d	lays & 12 months	Over 18 years in SmPC -	unless they remain at continued high risk,
,		But also 16 -18 years in	see Ch.18 Page 16. Note SmPCs do advise
		Green Book	a 4 th dose but GB should be followed.
Engerix B® Paediatric 0, 1, 6 months		0 to 15 years	Green Book policy for hepatitis B for all who
Engerix B® Paediatric 0, 1, 2 months		0 to 15 years	have received a primary course (which
Engerix B® Option of two doses of 1 ml (20mcg)		11 – 15 years	would include travellers) also children
for low-compliance adolescents given 6 months			vaccinated according to the routine
apart when the risk of hepatitis B is low and			childhood schedule and individuals at high
completion of course can be assured before risk			risk of exposure do not require a reinforcing
is high			dose of hep B containing vaccine, except
HBvaxPRO® 0, 1, and 6 months		16 years and over	healthcare workers (boost once at 5 years),
HBvaxPRO ® 0, 1, 2 months		16 years and over	patients with renal failure and at time of
HBvaxPRO ® Paediatric 0, 1 & 6 months		0 – 15 years	significant exposure. Read Ch. 18, page 13
HBvaxPRO ® Paediatric 0, 1, 2 months		0 – 15 years	in the GB for full details. See this blog for
			contradictory advice on healthcare workers
COMBINED vaccine	es (and schedules)		
Twinrix Adult® (Hepa	titis A and B) 0, 1, 6 months	16 years and over	See information about hepatitis A and
Twinrix Adult® 0, 7, 21, days and 12 months		18 years and over	hepatitis B regarding boosters above
Twinrix Paediatric® 0, 1, 6 months		1 – 15 years	
Ambirix® (Hepatitis A and B) 0 & 6-12 months		1 – 15 years	
• •	•	•	I nese vaccines are documented in records.
			ult dose of hepatitis A and a dose of typhoid.
	w dose diphtheria (for tr		
Revaxis ® 1 dose if risk	c at destination and UK	From 6 years - for	10 years if risk at destination and risk of
schedule completed m	nore than 10 years ago –	travel purposes expect	immunoglobulin not being available
see Green Book p372	, 0	to give older than this	
·		-	

MENINGOCOCCAL vaccine	AGE GROUPS	WHEN TO BOOST		
Menveo® Single dose (conjugate vaccine)	2 years	5-yearly for Hajj, Umrah certificate purposes as		
Nimenrix Single dose (conjugate vaccine) MenQuadfi Single dose (conjugate vaccine)	6 weeks of age 12 months of age and older	per KSA in 2017 ⁺ For travel, boost every 5 yrs until more data available. See NaTHNaC at reinforcing immunisation https://goo.gl/6eSWmu N.B. Children under 1 year need different dosing – see Green Book and NaTHNaC & note SmPC differs		
RABIES vaccine 2.5IU; one vial (and schedules)				
Rabipur® 0, 7, 21 or 28 days Accelerated primary course given IM on days0, 3, 7 and 365 when there is insufficient time to complete the 0, 7, 21-28 day course. Note: Rabies Vaccine BP made by Sanofi Pasteur was discontinued in 2022.	Any age but careful risk assessment under 1 year	Many travellers may not need a booster but one single booster dose of vaccine can be considered following thorough risk assessment, in those who completed a primary course over a year ago. This may be most effective if offered 5 years of more after the primary course if travel is assessed as high risk. See Vaccine Update page 5 in issue 282.		
YELLOW FEVER vaccine				
Stamaril® Single dose	Over 9 months	Lifelong in most. See resources for latest details. Certificate valid 10 days post vaccination		
CHOLERA vaccine				
Dukoral® Oral vaccine. 2 doses, minimum 1 wk. and maximum 6 weeks apart, given to those from 6yrs of age. 3 doses given in those 2 – 6 yrs old	2 years and over	6 months when given to those aged 2 – 6 yrs 2 yrs in those aged 6 yrs to adult age NBM 1 hr before & after vaccine		
JAPANESE ENCEPHALITIS vaccine				
IXIARO® 0 and 28 days for all age groups. 0.5ml dose for adults & 3 yr to < 18 yr age group 0.25ml for 2 months to < 3yr age group (See SPC for specific instructions) Note: SPC & GB change for new 0 & 7 days schedule in 18-64 yrs & off license in children from 2 mths and over 65 yrs when genuinely no time to complete standard schedule	From 2 months	1 year if at continuous/further risk All others, boost at 12-24 months but see GB for those 65 years and older. Second booster in 18-64 years offer at 10 years. Please see GB for children and those over 65 years for more specific information. Note: primary immunisation should ideally be completed at least one wk prior to JEV exposure		
TICK BORNE ENCEPHALITIS vaccine				
Tico-Vac® 3 doses of 0.5ml on day 0, 1-3 months after 1st dose, 5-12 months after 2nd dose For rapid short-term protection – 2nd dose can be given 2 weeks after 1st dose – see 'Green Book' Tico-Vac® Junior (0.25ml) 3 doses – same dosing	16 years and over 1 year to below 16	Booster at 3 years after initial 3 dose course is completed if individual continues to be at risk. After this, boosters can be given every 5 years but in those aged > 60 years, booster intervals should not exceed three years		
schedule as adult Tico-Vac®	years of age			

KEY

- + KSA = Kingdom of Saudi Arabia guidance, see NaTHNaC Hajj and Umrah (travelhealthpro.org.uk)
- * Within the Summary of Product Characteristics (SmPC)
- ** The Green Book (2022) refers to all hepatitis A products, so the 25 year protection also applies to the combined products and paediatric hepatitis A vaccines. Until further evidence is available on persistence of protective immunity, a further booster at 25 years is generally not needed except for those at ongoing risk. See the Green Book chapter (page 9) and NaTHNaC document at https://travelhealthpro.org.uk/factsheet/21/hepatitis-a
- ***SmPCs for Havrix Monodose & Havrix Junior Monodose (2022) and Avaxim Junior (2023) states 'Current data do not support the need for further booster vaccination among immune-competent subjects after 2 dose vaccination course' but we continue to follow UKHSA guidance as previously described, even in this situation.
